**Examiner's Amendment**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 16-21, drawn to a species non-elected without traverse, have been cancelled.

**Examiner's Comment**

This application is in condition for allowance except for the presence of claims 16-21, drawn to a species non-elected without traverse. Accordingly, said claims have been cancelled.

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 9, directed to the deactivating agent comprising oxygen, is no longer withdrawn from consideration since the claim to this species depends from or otherwise includes all the limitations of the allowed generic claim. However, claims 16-21, drawn to the species (2) [process for transitioning from a first polymerization reaction utilizing a metallocene catalyst to a second polymerization reaction utilizing a Ziegler-Natta catalyst wherein no deactivating agent is introduced to

Art Unit: 1713

the reactor], remain withdrawn from consideration (and cancelled herewith) since they do not depend upon or otherwise include all the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicants are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
